PERSONAL PROFILE

Results-driven Data & Product professional with 13+ years of experience in product management, data analytics, and financial business analysis, leveraging Generative AI, Microsoft Copilot, GitHub Copilot, and AI-assisted analytics to accelerate product delivery, automate insights, and support decision-making in banking and contact center environments. Experienced driving data-led strategies, agile execution, and regulatory-aligned delivery across financial services.

EDUCATION

B.E. (Electronics & Communication Engineering)
Technocrats Institute of Technology (Main), RGTU, Bhopal | 2008-2012

CORE COMPETENCIES

- Retail Banking & Regulation Adoption
- Wealth management Banking
- IVR Contact Center
- Identity and Access Management (IAM)
- Customer Relationship Management
- Risk Management
- Benefit Management
- Strategy Planning
- US Banking
- Data Analytics
- Product Development/Refinement
- Operational Efficiency
- Capital Markets
- Conversational AI
- Customer Journey Mapping

PROFILE SUMMARY

- **Senior Data/Product Professional (13+ Years):** Expertise in product management, data analytics, and financial business analysis leveraging Generative AI, Microsoft Copilot, and GitHub Copilot to accelerate delivery and transform complex data into decision-ready insights.
- **Fintech & Contact Center AI Transformation:** Proven track record delivering GenAI-powered IVR, Agent Assist, Virtual Agent, and intelligent reporting across Genesys Cloud, Power BI, and OpenAI frameworks.
- **Cross-Functional AI Adoption Leader:** Skilled in aligning data and AI strategies with business goals, guiding agile teams through AI-augmented development cycles to maximize operational efficiency.
- **Banking IT, Cloud & Regulation Expert:** Deep experience in regulatory compliance, Responsible AI frameworks, Identity & Access Management (IAM), and complex on-prem-to-cloud IVR migrations.
- **AI-Augmented PM & Strategy Documentation:** Proficient in using JIRA Copilot, Visio, and SQL scripts for business process modeling, sprint management, and building audit-ready artifacts (BRDs, SOPs, compliance maps).
- **Data Engineering & Near Real-Time Insights:** Hands-on experience with cloud infrastructures (AWS Basics) and visualization ecosystems (Power BI, Grafana, Tableau) to engineer automated data intelligence.

WORK EXPERIENCE SNAPSHOT

Assistant Manager | AI Product Owner | Technical Business Analyst | Data Analytics Lead

Synechron Technologies Private Ltd. (Client: Morgan Stanley, BNY Mellon, First Abu Dhabi Bank) | Aug 2021 - Present

Client: Morgan Stanley (Jun 2024 - Present)

- Product Owner / Technical Business Analyst for Morgan Stanley Wealth Management Contact Center Analytics, delivering AI-enabled analytics and cloud-based Power BI dashboards for leadership teams.
- Driving Generative AI, Conversational AI, Virtual Agent, Contact Center AI (CCAI), and AI Orchestration initiatives through prompt management, AI call summarization, Q&A automation, Agent Assist/Call Assist (Genesys Service Assist), and Customer Self-Service capabilities to improve agent productivity and customer experience.
- Leveraging Microsoft Copilot and JIRA GenAI for PRDs, user stories, backlog grooming, sprint summaries, and release notes, accelerating delivery and documentation quality.
- Utilizing GitHub Copilot for AI-assisted SQL validation, automation scripts, and API testing, improving analytics reliability and speed.
- Designing Genesys and Power BI dashboards for agent performance, queue health, workforce KPIs, and CX metrics to enable faster data-driven decisions.

Client: BNY Mellon (Jan 2023 - May 24)

- IAM Adoption Program Lead, managing a 70+ member team and onboarding ~1000 applications annually with secure, compliant access controls.
- Building JIRA dashboards, Confluence reports, and Excel automation, improving operational visibility, governance, and efficiency.

Client: First Abu Dhabi Bank (Aug 2021 - Jan 2023)

- T24 AA modernization and CPR regulatory compliance, delivering PwC-validated compliance across Retail and Islamic Banking.

AI & GENERATIVE AI

- Microsoft Copilot (Productivity, Documentation, Backlog Grooming, Reporting)
- GitHub Copilot (AI-assisted SQL, API testing, automation scripts)
- Prompt Engineering & Lifecycle Management
- Generative-AI for Q&A, Summarization, Sentiment Analysis
- Agent Assist, Voicebot, Conversational AI, Virtual Agent & chatbot (POC only) (Genesys Service Assist)
- Contact Center AI (CCAI), AI Orchestration & Customer Self-Service

KNOWLEDGE PURVIEW

- AI Enablement in Business process
- Digital Transformation
- Regulatory & Compliance Awareness
- Cloud & on-Prem Integration projects
- Gap analysis & Impact Assessment
- Business Process Modeling
- Product Management
- Data & Technical Analysis
- Operational Reporting
- Technical Documentation
- Requirement elicitation
- Requirements Gathering
- Agile expertise
- BI tools
- Stakeholder Relations

TECHNICAL SKILLS

Version Control: TFS, Git, Visual Studio.

Cloud Platforms: AWS Basics

Database: Oracle SQL, JQL, MS Access.

Middleware: Kafka

Reporting: JIRA, Azure Dashboard, Clarity, Confluence.

PM Tools: Trello, MS Planner, CoPilot, Azure Boards, JIRA.

Methodologies: Agile, Waterfall, Scrum, Kanban.

Visualization: Power BI, Genesys Dashboards, Grafana, Tableau.

Data Analysis: Excel, SQL, Power Query

APIs: Genesys APIs.

ETL: SQL-based ETL

Platforms: Genesys Cloud, IVR System, CCAI.

Other: SailPoint, Draw.io, Visio, Adobe XD.

WORK EXPERIENCE (CONTINUED)

Business Analyst / Product Owner / Scrum Master

Gravity iLabs (Business Studio) | Dec 2019 - Aug 2021

- Led the Strategy DotZero (SDZ) project, managing enterprise performance monitoring and business planning.
- Tailored Jira and Power BI dashboards for clients like the Department of Prime Minister & Cabinet, Department of Finance, and Department of Defense.
- Implemented a data-driven approach to enterprise performance monitoring, resulting in increased data accuracy and actionable insights.
- Conducted training sessions on agile methodologies, leading to increased team efficiency and decreased project delays.
- Articulated a clear product vision and user stories, facilitating transparent project management processes.
- Led as Scrum Master for the Customer Success team, ensuring successful sprint ceremonies and product backlog refinement.
- Managed multiple initiatives concurrently, spanning from requirement analysis and wireframing to team support, validation, deployment monitoring, and efforts to enhance SLAs for bugs and change requests.

Business Analyst / IT Analyst

Tata Consultancy Services | Jan 2013 - Dec 2019

- Improved the Direct Bank Sales Application's features to align with North American banking regulations, ensuring seamless functionality.
- Acted as a subject expert for retail product solutions, maintaining client relationships and documentation standards.
- Generated cost savings of INR 50,000 per year through system enhancements and business architecture development.
- Received accolades for documentation, SOPs, and process improvements from Citibank.

ANNEXURE | PROJECTS

Jun'24 - Current | Technical Data/Business Analyst / Product owner (Asst. Manager) | Synechron @ Morgan Stanley, Bangalore

Project: Wealth Management Contact Center Data & Analytics | **Team Size:** 100+

Description: Contact center is a centralized Competency hub where customers interactions are managed. We translate and managed the data into visual insights, for Managers, supervisors, and agents who can utilize contact center performance and metrics by providing meaningful views, dashboards tailored to business needs.

- Supporting Genesys IVR migration from on-prem to cloud, defining the reporting roadmap for OOB and custom metrics, including new participant data integration for the analytics squad.
- Lead AI-enabled data and analytics initiatives for Morgan Stanley's Wealth Management Contact Center, translating large-scale interaction data into actionable insights and role-based dashboards for managers, supervisors, and agents.
- Partner with Business, ASG, Engineering, and Data teams to define and prioritize reporting and AI use cases, including Generative AI-driven call summaries, Q&A automation, and Elastic-based reporting, reducing manual analysis effort by 30%.
- Drive Generative AI, Conversational AI, Virtual Agent, Contact Center AI (CCAI), and AI Orchestration initiatives by integrating Genesys APIs with AI services to enable Service Assist, sentiment analysis, intelligent call insights, Customer Self-Service capabilities, and agent productivity metrics, reducing Average Handle Time (AHT) by 12%.
- Design and deliver Power BI and Genesys dashboards covering agent performance, queue health, workforce KPIs, and CX metrics, enabling 25% faster, data-driven supervisory decisions.
- Collaborate with business and engineering teams to support Customer Journey Mapping, AI-enabled customer interaction analytics, and optimization of digital customer experiences across Wealth Management contact center operations.
- Develop agent performance reports and CX survey analytics, enabling leadership to implement targeted improvements and increase customer satisfaction scores by 10%.
- Collaborate with engineering teams on Grafana and Salesforce data ingestion, translating business requirements into technical specifications, data models, APIs, and SQL-based ETL pipelines.
- Produce AI-ready technical and product documentation, including BRDs, gap analysis, migration runbooks, release notes, and agile artifacts, ensuring audit readiness and regulatory alignment.

Jan'23 - May'24 | IAM Lead | Synechron Technologies private Ltd @ BNY Mellon, Bangalore

Project: IAM Adoption Program | **Team Size:** 70

Description: The IAM program provides a standard approach to the most critical applications by allowing app owners, approvers to provide the right access to the right resources at the right time.

- Implemented Access Hub and Centralized Certification onboarding, utilizing Plain Language Entitlement services through SailPoint to facilitate IAM adoption across applications.
- Managed Access Management and access entitlement certification processes, focusing on providing business-friendly descriptions to assist approvers in understanding and approving access requests.
- Collaborated across various lines of business including Asset and Wealth Management, and Technology Services groups to integrate IAM services.
- Orchestrated the delivery plan for onboarding approximately 1000 applications annually, including critical applications such as SOX, SOC1, and PBS, as part of the IAM Adoption program.
- Engaged with diverse stakeholders including third-party vendors, Embedded Control Managers (ECM), application managers, Operations, and Development teams to onboard various data components such as Active Directories (ADS), LDAPS, CEEP, and application-level privileges to a centralized platform (SailPoint).
- Developed JIRA Dashboards, Confluence reports, and automated Excel macros to streamline reporting and operational processes.

Dec'21 - Jan'23 | PMO Consultant | Synechron Technologies private Ltd @ First Abu Dhabi Bank, Bangalore

Project: T24 Arrangement Architecture | **Team Size:** 130

Description: Under T24 AA project scope is to replace the old Lending and mortgage module with the latest AA module to comply over regulation & security changes.

- Collaborated closely with the T24 technical team and business stakeholders to identify various business units, products, and services utilizing LD and MG services. Developed a comprehensive delivery plan that successfully aligned with practical business needs.
- Enhanced the Delivery model by implementing improved processes, developing solutions, and supervising their effective implementation.
- Generated projection reports, daily trackers, and Gantt charts tailored to business requirements, utilizing tools such as JIRA, Power BI, MS Planner, and MS Project.
- Displayed adherence to budgetary requirements through thorough planning and consistent expense monitoring.

Aug'21 - Dec'22 | Lead Business Analyst | Synechron Technologies private Ltd @ First Abu Dhabi Bank, Bangalore

Project: Consumer Protection Regulation (CPR) | **Team Size:** 80

Description: Under CPR CB made lot of regulation changes our task was to make FAB complaint over Retail (consumer), Islamic Banking, worked on different product like (Mortgage CASA, CC, Elite, Islamic and Mobile banking journey).

- Applied critical thinking to analyze changes in CB regulations compared to existing FAB products, facilitating the bank's compliance efforts.
- Collaborated closely with application teams, legal advisors, marketing, and sales collection teams.
- Successfully verified by PwC auditors for comprehensive regulation implementation, documentation, Standard Operating Procedures (SOPs), and various processes, receiving commendations from Bank VPs and auditors.
- Developed short-term objectives and long-term strategic plans to enhance compliance initiatives. Engaged directly with Business Unit heads and VPs to implement effective compliance processes.
- Provided mentorship to other Business Analysts, guiding new joiners on documentation, reporting, and related processes.

Dec'19 - Aug'21 | Business Analyst / Product Owner / Scrum Master | GravityLabs (Business Studio), Bangalore

Project: Strategy DotZero (SDZ) | **Team Size:** 70

Description: Strategy DotZero (SDZ) manages 360 for the business which helps in monitor enterprise performance via dashboards, operationalized business operating model, standardize business planning, and investment portfolio.

- Crafted and communicated product vision and user stories in a manner that was easily comprehensible for development teams.
- Implemented Agile methodologies and processes to foster disciplined and transparent project management practices.
- Customized Jira dashboards and interactive PowerBI dashboards for prestigious clients such as the Department of Prime Minister & Cabinet, Department of Finance, Department of Defense, ANU, UW, and others.
- Worked as the Scrum Master for the Customer Success team, leading all ceremonies within a 4-week sprint from product backlog refinement to user story delivery.
- Managed multiple initiatives concurrently, spanning from requirement analysis and wireframing to team support, validation, deployment monitoring, and efforts to enhance SLAs for bugs and change requests.

Jan'13 - Dec'19 | Business Analyst / IT Analyst | TCS @ Citibank NA, Mumbai

Project: Direct Bank Sales Application | **Team Size:** 40

Description: DBSales is an in-house North American Retail Consumer banking application participated in before and after the account opening.

- Contributed to enhancing functionality for the DBSales application (ASP.NET C#), supervising multiple levels of testing including functional, regression, user acceptance, and integration tests within a waterfall methodology framework.
- Acted as a Subject Matter Expert and Advisor for Retail Product and IT solutions, leading implementations across North America.
- Managed client relationships effectively from an offshore capacity, ensuring ongoing satisfaction and communication.
- Comprehensive documentation including Standard Operating Procedures (SOPs), Functional Requirement Documents (FRDs), Low-Level Design (LLD), and High-Level Design (HLD).

Sep'13 - May'19 | Business Analyst / Scrum Master | TCS @ Citibank NA, Mumbai

Project: ServiceNow Operations | **Team Size:** 90

Description: Extensively used in all regions, NA, APAC, EMEA for all IT services management, IT operations management, and IT business management.

- Developed a comprehensive roadmap for the implementing ServiceNow across the North American region, including integration with various applications.
- Collaborated with diverse stakeholders to supervise Release Management, Defect Management, and Change Request Management for multiple applications. Implemented custom reports within ServiceNow to meet specific business needs.
- Created training materials and Standard Operating Procedures (SOPs) for infrastructure and Disaster Recovery implementation.

Jan'13 - Dec'13 | System Engineer | TCS @ Citibank NA, Mumbai

Project: Associate Portal | **Team Size:** 20

Description: Develop and manage web-based in-house app (under yellow belt six sigma process) for assisting in Audit, Daily reports, Screening test data, demographics, logs and archival process.

- Conducted thorough analysis of user requirements, performed impact assessments, and authored system requirements documents.
- Established the business architecture as a foundation prior to application development.
- Collaborated with various project teams to integrate the application with select in-house HR systems.
- Achieved significant cost savings, averaging 50,000 INR per year through efficient implementation strategies.
